EUROPEAN FEL Design Study

Deliverable N°: D 4.2
Deliverable Title: Installation of optical klystron
Task: DS-4
Authors: Sverker Werin (MAX-lab), Johannes Bahrtdt (BESSY)
Contract N°: 011935

**Project funded by the European Community
under the “Structuring the European Research Area” Specific Programme
Research Infrastructures action**

D4.2 Installation of optical klystron

The optical klystron system, two undulators and a magnetic chicane, has been delivered from BESSY GmbH and installed on site at MAX-lab. The devices have successfully been operated by the control system.

Fig. The two undulators and chicane (hidden in between) in place in the MAX-lab hall.
